PROFESSIONAL EXPERIENCE

Sales Associate

Best Buy

South Portland, ME

June 2022 – Present

- Exceeded sales goal by approximately 37% last quarter, contributing \$950 per hour on a goal of \$700.
- Deliver consultative, customer-first sales experiences by asking targeted discovery questions, actively listening to customer needs, and recommending technology solutions aligned with budget, use case, preferences, and desired outcomes.
- Translate complex product features, specifications, and service options into clear, relevant customer benefits that support informed purchasing decisions.
- Assisted an average of 15 customers per eight hour shift, balancing pace without compromising solution completeness or customer satisfaction during high volume hours.
- Build rapport quickly with customers from varied backgrounds while maintaining a professional, service-first approach during high-volume periods and holiday sales events.
- Recognized as **Store MVP** for outstanding communication, customer service, exceeding sales goals.
- Use product knowledge, empathy, and effective questioning to address concerns, compare options, and guide customers through purchasing decisions.
- Maintain current knowledge of changing products, inventory availability, and service offerings to provide accurate, timely recommendations.
- Demonstrate resilience, adaptability, and composure while managing questions, objections, competing priorities, and a fast-paced sales environment.
- Consistently referred customers to Geek Squad by scheduling appointments and documenting detailed notes to support a seamless handoff.

TECHNICAL PROJECT EXPERIENCE

Product Owner & Systems Engineer

12 Planet Revolution — Team Won

Burlington, VT | Aug. 2024 – Nov. 2024

- Led an 8-person cross-functional development team in planning and delivering a 3D action game, coordinating priorities, communicating requirements, and supporting team alignment.
- Designed core user interface and gameplay systems in C# and Unity, balancing user needs, usability, technical requirements, and project delivery deadlines.
- Presented technical decisions and product concepts clearly to teammates with differing responsibilities, strengthening collaboration and execution.
- Developed high-performance enemy AI using resource-conscious design practices, demonstrating disciplined problem solving and technical ownership.

Software Developer

Poly-Vinyl Pests! — IDX Legends

Burlington, VT | Jan. 2025 – May 2025

- Collaborated on a top-down player-versus-player boss-rush action game that generated 500+ Steam wishlists in its first week, earned 91% positive reviews, and helped build a 100+ member Discord community.
- Built reusable AI and graphics solutions in Unity, demonstrating the ability to learn complex technical products, solve problems, and communicate effectively across a development team.
- Developed an asynchronous Unity NavMesh pathfinding framework that supported real-time boss behavior while reducing CPU overhead and preserving player experience.
- Designed the final game level, including tower-defense mechanics and a custom caustics rendering tool, using structured development practices to create reusable systems.

Gameplay Engineer

ChillJoy — Workhorse Studios

Burlington, VT | Jan. 2024 – May 2024

- Designed and developed core gameplay mechanics for a third-person action shooter, including six distinct firing modes, using Unity and C#.
- Created and maintained technical documentation that improved team alignment, clarified core mechanics, and supported efficient collaboration.

ADDITIONAL EXPERIENCE

Deckhand

Portland Discovery

Portland, ME

June 2021 – Aug. 2021

- Supported vessel operations including docking, anchoring, line handling, safety procedures, and equipment readiness in a customer-facing marine environment.
- Followed detailed safety protocols and collaborated effectively with team members in a time-sensitive operational setting.

EDUCATION

Bachelor of Science in Game Programming

Champlain College

Burlington, VT

May 2026

Relevant Coursework: Networking for Online Games, Networking for Cyber Security, Cyber Security Fundamentals, Advanced Programming, Software Refactoring, Data Structures and Algorithms, Computer Architecture, Game Architecture, AI for Games, Graphics and Animation Programming, Game Physics, Discrete Mathematics, and 3D Mathematics.

AWARDS AND RECOGNITION

Maine State Speech and Debate Champion, Story Telling

Cape Elizabeth Speech and Debate Club

Cape Elizabeth, ME

2021

- Earned statewide championship recognition for delivering a compelling, well-structured story, demonstrating audience awareness, clear communication, preparation, improvisation, incorporating feedback and criticisms, and confident presentation.
