PROJECTS

Poly-Vinyl Pests! | IDX Legends

Software Developer

Jan – May 2025

Burlington, VT

- Core contributor during the development of a 3D action shooter; received positive reception on Steam launch and built a 100+ member Discord server community.
- Designed and programmed boss mechanics including AI-driven movement using a pathfinding algorithm to dynamically generate enemy trajectories.
- Designed and implemented the final level of the game which included new gameplay mechanics and custom graphics for key UI elements.

12 Planet Revolution | Team Won

Product Owner and Systems Engineer

Aug – Nov 2024

Burlington, VT

- Lead the development of a 3D prison escape action game including managing an 8-person development team.
- Designed core player gameplay UI and built the core systems including the camera movement using C# in Unity.
- Implemented high-performance custom enemy AI by using colliders to unload unnecessary agents.

ChillJoy | Workhorse Studios

Gameplay Engineer

Jan – May 2024

Burlington, VT

- Designed and built core gameplay mechanics for 3rd-person action shooter including six unique firing modes.
- Created and maintained technical documentation to streamline team collaboration and ensure alignment on core mechanics and technologies.
